PROJECTS

Home NAS | *Ubuntu Server, Docker, Ansible*

Mar 2023

- Created a local storage server to host digital media.
- Deployed the server remotely using an Ansible Playbook.

Automating Car Marketplace | *Python, Selenium*

Jan 2023

- Scraped IAAI's vehicle listings for their IDs, and then automated their input inside a filter program.
- Learned how to manipulate HTML, create JSON object, and use headless browsers.

Self-Hosted Media Server | *Linux: Ubuntu Server, Docker-Compose, OpenSSH, OpenVPN*

Aug 2022

- Powered the server with "Ubuntu Server" in headless configuration using OpenSSH.
- Hosted operating software in docker containers.
- Learned: Virtualization vs. Containerization, hosting private VPN networks, and Linux essentials (CLI navigation, drive mounting, and OpenSSH.)

EXPERIENCE

IT Support

Aqualife

Sept 2021 – Jan 2022

Amman, Jordan

- Provided technical support to colleagues by troubleshooting devices, installing drivers, and setting up equipment.

Business Development Intern

Aqualife

Sept 2021 – Jan 2022

Amman, Jordan

- Prospecting and outreach: Improving sales by reaching out to potential leads through social media and cold calls.

Junior Intern

The Specialists Development and Financial Consulting

June 2019 – Sept 2019

Amman, Jordan

- Conducting research, creating slides, and assisting with the development of persuasive materials.

EDUCATION

B.S. in Industrial Engineering and Management

Jacobs University Bremen

Sept 2019 – June 2022

CERTIFICATES

CS50AI - Harvard University

AI / ML topics: Graph Search Algorithms, Classification, Optimization, and Reinforcement Learning

CS50x - Harvard University

Algorithms, Data Structures, and Web Programming.

TECHNICAL SKILLS

Python

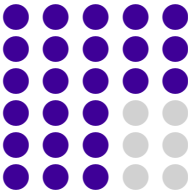

SQL

Git

Javascript

Docker

Linux

LANGUAGES

English

Arabic

German
